## **DETAILED ACTION**

### ***Response to Amendment***

1. Claims 1-17, 30, and 39 have been withdrawn. Claim 18 has been amended.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 18-29 and 31-38 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the use of pH and/or temperature to terminate and/or induce crosslinking, does not reasonably provide enablement for the use of "at least one reaction condition". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims. The current invention is narrow in scope to several means for terminating a crosslinking reaction, however, the scope of claim 18 encompasses any reaction condition, including such conditions as pressure, concentration of the reactants, volume, reaction time, as well as many other variables that are not included in the specification.

***Double Patenting***

4. Claim 18 is rejected on the ground of nonstatutory double patenting over claims 45 of U. S. Patent No. 7,090,745 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: both the patent and the application are claiming a method of crosslinking a composition of a hydrophilic polymer and a saccharide (sugar) before addition (pregel) and then adding the composition to paper pulp and inducing crosslinking.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
